Warsaw, Poland (residence & work permit) | linkedin.com/in/zap-al | +48 451 246 926

SUMMARY

Senior Data Engineer with 7+ years of experience building cloud data platforms on Azure and AWS, specializing in Databricks, Spark, and CI/CD automation.

Microsoft-certified (DP-203, DP-750); lead of a company-wide Azure Upskilling Program (40+ engineers, 80+ certifications).

Seeking a Lead Data Engineer or Solution Architect role delivering scalable, cost-optimized, cloud-first data solutions.

PROFESSIONAL EXPERIENCE

Capgemini – Senior Data Engineer – Poland

Aug 2023 – Present

FinTech Data Platform

- Optimize data processing architecture using Databricks and Databricks Asset Bundles, improving efficiency.
- Architect Azure Pipelines for end-to-end data processing orchestration.
- Integrate Azure Data Factory pipelines, ensuring scalable and automated data workflows.
- Developed a robust testing framework, reducing release risks and enhancing deployment stability.
- Host Quarterly Planning and Retrospective sessions, enhancing team collaboration.

Azure Upskilling Program — Program Lead (Mar 2025 – Present)

- Lead a Capgemini-wide Azure upskilling program for 1+ year, grown from Poland-only to international participation; onboarded 40+ specialists across intern, re-skilling, and cross-direction tracks on a rolling basis.
- Drove 80+ Microsoft certifications (AZ-900, DP-900) with a 100% pass rate, backed by self-authored preparation guides.
- Re-designed 80% of the curriculum into a hands-on-first format (~80% of program time): 3–4 end-to-end assignments per participant covering Azure-native services, CI/CD, and Azure Databricks.
- Personally review every submission and host public demo sessions where participants present solutions to the active cohort.
- Enabled 20+ graduates to join Azure and Databricks projects, with interns regularly staffed before program completion.

Mimesis Inc – Senior Data Engineer & Co-Founder – Armenia

Jan 2021 – May 2023

AI-Driven Data Processing & Infrastructure

- Designed scalable data ingestion pipelines using AWS S3, AWS RDS, and Spark (PySpark).
- Led backend API development with Python and FastAPI, integrating data pipelines into the product architecture.
- Containerized ML and ETL workloads (Docker) and established Jenkins CI/CD, reducing operational overhead.
- Designed scalable cloud infrastructure for ML and data workflows, improving system resilience and flexibility.

EPAM Systems – Data Engineer – Belarus

Jul 2019 – Sep 2021

ML-Driven eCommerce Optimization (Sep 2020 – Sep 2021)

- Designed scalable Airflow-based data pipelines, ensuring efficient data flow and transformation.
- Optimized real-time data processing using Apache Spark and Kafka, reducing data latency and increasing performance.

Enterprise BI & Marketing Data Platforms (Oct 2019 – Jul 2020)

- Developed ETL pipelines in Azure Data Factory and architected a star-schema warehouse model, optimizing Power BI analytics performance.
- Built a multi-zone Azure Blob Storage model with Azure Databricks pipelines and automated CI/CD (GitHub, Jenkins).

CERTIFICATIONS & EDUCATION

Azure Databricks Data Engineer Associate (DP-750) – Microsoft – [certificate link](#)

Jun 2025

Azure Data Engineer Associate (DP-203) – Microsoft – [certificate link](#)

May 2025

Azure Data Fundamentals (DP-900) – Microsoft – [certificate link](#)

Feb 2024

Azure Fundamentals (AZ-900) – Microsoft – [certificate link](#)

Dec 2023

M.S. in Physics & Programming – Belarusian State University (BSU)

2016 – 2021

TECHNICAL SKILLS

Programming: Python (PySpark), SQL.

Cloud: Azure (Data Factory, Data Lake Storage Gen2, DevOps, Pipelines, Blob Storage), AWS (S3, RDS).

Data Platforms: Databricks (Delta Lake, Unity Catalog, Asset Bundles), Apache Spark, Kafka, Airflow, Hive.

Databases: PostgreSQL, Microsoft SQL Server, MongoDB.

DevOps & Infrastructure: Terraform, Kubernetes, Docker, Jenkins, Linux.

Languages: English (B2, daily working language), Polish (A2–B1), Russian (native).

I hereby give consent for my personal data included in this application to be processed for the purposes of the recruitment process in accordance with Regulation (EU) 2016/679 (GDPR).
